

Implicit Cursor Q2

To write a PL/SQL program to update salary of all employees by 20%.
If total salary > 100000 then rollback else commit.

Program:

```
declare
    sal income.salary%type;
begin
    UPDATE income SET salary=salary*0.2+salary;
    SELECT SUM(salary) INTO sal FROM income;
    if sal>100000
    then
        rollback;
        dbms_output.put_line("Rollbacked");
    else
        commit;
        dbms_output.put_line("Committed");
    end if;
end;
```

Output:

```
SQL> /
Rollbacked

PL/SQL procedure successfully completed.

SQL> select * from income;
```

ENAME	SALARY
Sindhu	65000
Vivek	1200
Zameel	20000
Sumayya	15000
